AWARDS

• Technoxian World Robotics Championship

Noida, Delhi, India

Constructed a website which enables tracking of public transport vehicles in various routes of Kathmandu and provides routes based on the user's location and destination. Secured best presenters award in the competition.

• IEEE Solid-State Circuits Society Arduino Contest

Created a landslide emergency warning system which predicts landslides based on soil moisture, alerts authorities such as ambulances and police, and provides the exact location of the landslide using GPS. Secured third position in the competition.

• Orbit Engineering Expo 2.0

Sanepa, Lalitpur, Nepal

Designed a glove to assist individuals with disabilities, featuring continuous monitoring of hand movements updated to a website, control of household appliances through hand gestures, and more. Secured second position in the competition.

ADDITIONAL SKILLS

Track and field athlete (long jump, sprints), skilled soccer player, proficient writer (with published articles), and adept guitarist.
